

AUCKLAND CITY MISSION

The Auckland City Mission is in the middle of the most exciting undertaking in its 100 year history.

Mission HomeGround is unlike anything seen before in New Zealand - a purpose built headquarters set for completion in 2020, offering 40 apartments for our homeless clients and another 40 for those on the social housing register.

But more than that, HomeGround will be the Mission and its people's turangawaewae - a place to share food, a place for health services, advice, emergency support as well as activities and amenities for both our clients and the wider community.

HomeGround will be the centre of the Mission's focus on tackling food insecurity and hunger in our community.

From idea to reality, Mission HomeGround has been meticulously planned, designed with sustainability, form and function in mind and shaped by world best practice. HomeGround will be a building for all of Auckland to be proud of as the Mission teams continue and elevate their work on the frontline of poverty and vulnerability.

There is a \$90 million fundraising target. An incredible \$74 million has already been raised but still need some serious help to get it over the line.

If you would like to support this incredible project you can donate directly via [**www.aucklandcitymission.org.nz/homeground**](http://www.aucklandcitymission.org.nz/homeground)

“A community can flourish only when its most vulnerable are treated with compassion and dignity, and when effective methods and resources are applied to restore their mental and physical wellbeing. This is the purpose of HomeGround. We trust all Aucklanders will help us realise this vision.”

Chris Farrelly, Auckland City Missioner
